

## ENTERPRISE-WIDE MOBILE DEVICE MANAGEMENT SOFTWARE

AirWatch is a complete and comprehensive mobile device management solution. Designed to track, monitor & manage your mobile devices as well as the people who use them, AirWatch provides you with a single, integrated, real-time view of all your cellular devices. It's Mobility Simplified.

Because it's easy to use and functionally robust, AirWatch can flex and adapt to meet the needs of your business and your mobile work force. With AirWatch, you can remote control into any device for troubleshooting. You can provision applications and firmware to a single device, to your entire fleet of devices or any subset in between. You can manage all your mobile assets—applications, SIM cards, peripherals and the device itself—in real time, providing you with total, enterprise-wide, mobile asset visibility.

### QUICK FACTS

- ▶ Total Mobile Device Asset Tracking and Lifecycle Management
- ▶ Support of Both WWAN and WLAN Mobile Devices
- ▶ Highly Scalable with No Maximum on the Number of Devices Supported
