Opticon Mobility Group Announces NAV, Hosted Device Management and Enhanced Messaging for Small to Medium Businesses

Renton, WA – March 17, 2009 - Opticon Mobility Solutions announced today the release of three new, pre-loaded software applications for its award winning line of ruggedized Smartphones:

Opticon Inbox allows users to scan barcodes directly into an email with time, date, and location stamp as well as a signature block for enhanced messaging.

MobiumGPS Navigation provides maps, directions and routing information for mobile workers.

AirWatch Device Management is a hosted service that allows customers to track and manage mobile devices over-the-air (over the carrier network).

The Director of Opticon Mobility Solutions, Don Davis said, "We are working with our AT&T Certified Partners to create out of the box solutions that are fast to deploy without the need for integration services. This is key for small to medium businesses who are looking for solutions that save them time and money in this tough business environment."

About the H19

The award winning H19 features Windows Mobile 6.0, quad-band cellular (GSM/eGPRS), WiFi and Bluetooth communication, an integrated GPS module and numeric keypad. With your choice of laser barcode scanner, or 2D CMOS Imager, the H19 is the perfect productivity tool for any mobile workforce.

About MobiumGPS

MobiumGPS is an enterprise grade mobile workforce productivity tool that combines voice navigation, GPS tracking, and route optimization to dramatically improve the productivity of mobile workers.

About AirWatch™

AirWatch™ is an enterprise-scale management console designed to provide a single point of management, monitoring and support for mobile devices and users.
